SITUATION SUMMARY

Labor Day Weekend BART Transbay Tube Closure

BART has shut down train service between Oakland and San Francisco over the Labor Day weekend, September 5-7, so workers can rebuild a section of track near the Transbay Tube. Train service stopped at the end of service Friday, September 4, and will remain closed until the start of service on Tuesday morning. BART also wants to remind people since Monday is a holiday, BART will operate on a Sunday schedule that day.

- Nearly 100 buses will continuously shuttle passengers between 19th Street BART Station in Oakland and San Francisco's Temporary Transbay Terminal.
- The West Oakland BART Station will be closed during the shutdown. If West Oakland is your home station, there will be a shuttle available to take you to 19th Street/Oakland station.
- Additional information regarding the modified BART schedule can be accessed here:
<https://www.bart.gov/news/articles/2015/news20150803-0>

Weather of Concern

- No significant Weather Watches or Warnings are in effect

Active Weather Warnings, Watches and Advisories by County:

WEATHER

WEATHER SYNOPSIS BY REGION:

NORTHERN CALIFORNIA AND CENTRAL COASTAL AREAS:

Eureka Weather:

A gradual warming trend is expected across northwest California for the week ahead. This is a result of a ridge of high pressure over the eastern Pacific nosing into the west coast. Dry conditions will persist with mostly sunny skies.

Medford Weather:

The forecast area will remain dry through the week, with upper level ridging overhead and a thermal trough just to our south. After a morning of frost and freeze east of the cascades today, temperatures will gradually warm through the week, and although highs today will be 5 to 10 degrees below normal for this time of year, highs will reach up to 15 degrees above normal by this weekend, and triple digits will not be out of the question for some of the usually warmer locations within the forecast area.

Reno Weather:

After a cold start, high pressure rebuilding over the west will bring a warm up with very warm and dry conditions for the upcoming week.

San Francisco Weather:

A region-wide warming trend is forecast to continue through Labor day as high pressure builds over the state and light offshore flow persists. Warm and dry weather conditions are then expected to continue through next week and into next weekend.

WEATHER

WEATHER SYNOPSIS BY REGION:

CENTRAL CALIFORNIA AND SOUTHERN SAN JOAQUIN VALLEY:

Sacramento Weather:

Dry with temperatures warming well above normal this week. Locally gusty northerly wind continues late nights and mornings for the next few days in the northern Sacramento Valley and surrounding foothills.

Hanford Weather:

Mostly clear skies and increasing temperatures are expected for the next several days as high pressure moves in over the region.

SOUTHERN CALIFORNIA:

Los Angeles Weather:

A warming trend is expected through next week as upper-level high pressure over Texas expands west and weak offshore flow develops. Temperatures will be above normal through the period, with well above normal temperatures likely later in the week.

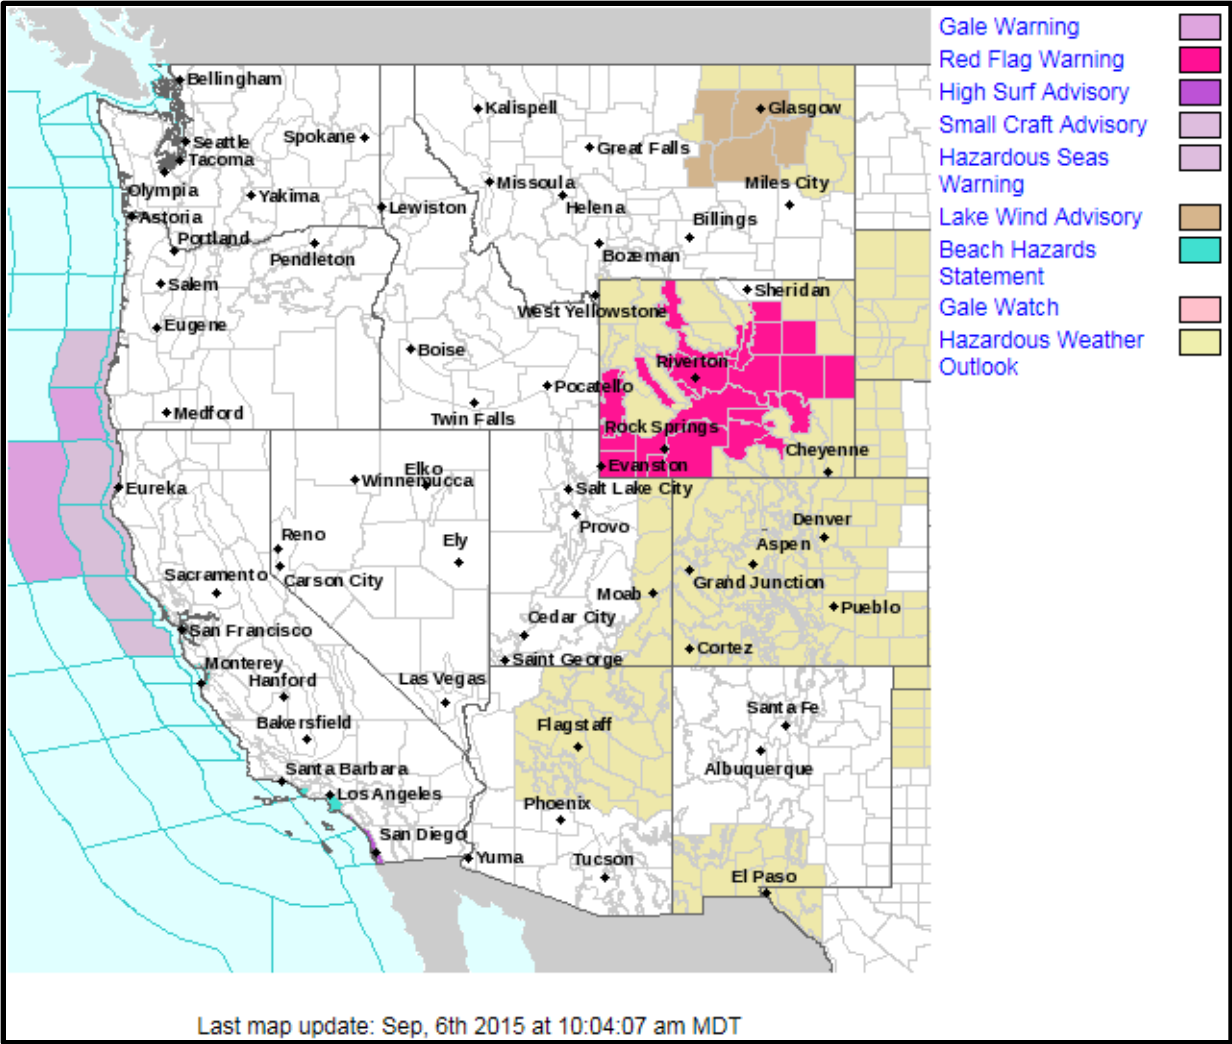

Extreme Southwestern California including Orange, San Diego, Western Riverside and Southwestern San Bernardino Counties:

Warmer weather returns through the middle of next week as high pressure builds back into the area from the east and replaces the trough. This will also result in a shallower marine layer with less extensive low clouds. Temperatures will be above average for much of next week with no precipitation expected.

Southeast California Weather:

An influx of tropical moisture will result in the possibility of showers and thunderstorms from areas near the Colorado River Valley and to the east through Tuesday evening. Otherwise expect dry conditions across the area. Temperatures will steadily warm through Thursday then remain above normal through the end of the week.
